I'm a Ph.D. student in Computer Science at Georgia Tech, working with Dr. Polo Chau. My research goal is to enhance **machine learning interpretability**, to promote trust in machine learning models and broaden access for the technologies. My research thrusts are:

- Scalable visual discovery for trustworthy and interpretable machine learning
- Actionable insights to protect and troubleshoot models
- Broader machine learning access and education opportunities

Specifically, I design and develop interactive visual interfaces which help people easily interact with machine learning models. My research is supported by JPMorgan AI PhD Fellowship. I have been fortunate to work with amazing researchers, engineers, and scientists at  Microsoft,  NVIDIA, and  Intel.
