

Haekyu Park

My research focuses on **democratizing artificial intelligence (AI)** — helping people more easily access, learn, and understand AI technologies. Specifically, I design and build **interactive visual tools** to help people easily **interpret, explore, and apply AI** to many important domain problems. My long-term goal is to cultivate an AI ecosystem where people of diverse backgrounds, skill sets, and domains would work harmoniously to invent the next AI-powered innovations.
